

Executive Annual Report · 2024

ACME Insurances · generated 2026-06-02 · run id 4c9b2df6b4f5 · source CSV 362326717019

Executive summary

The gross written premium for ACME Insurances in 2024 reached €26,271,000, marking a significant 23.6% increase from 2022. This growth underscores our strategic focus on expanding market share and diversifying product offerings. Our loss ratio stood at 39.5%, reflecting prudent risk management practices. Customer satisfaction improved with an NPS score of 46, indicating a positive trend in client relations. Additionally, the renewal rate reached 90.3%, highlighting strong customer loyalty. Digital adoption among our clients increased to 78.9%, demonstrating our commitment to leveraging technology for enhanced service delivery. Looking ahead, we aim to build on these achievements and continue driving sustainable growth in 2025.

Yearly performance narrative

Commercial. ACME Insurances saw a significant growth in Gross Written Premium (GWP) to €26,271,000 in 2024, marking a 23.6% increase from the previous year. The company also secured 10,311 new policies and maintained a strong renewal rate of 90.28%, indicating customer satisfaction and loyalty.

Claims. In 2024, ACME Insurances handled 4,422 claims with a total payout of €10,370,000, resulting in a loss ratio of 39.49%. The average settlement time was reduced to 17.3 days, demonstrating improved efficiency compared to the previous year.

Customer. Customer satisfaction remained steady at an NPS score of 46.29, with 78.9% of customers adopting digital services for their insurance needs. ACME Insurances received 308 complaints in 2024, a slight increase from the prior year but indicative of ongoing efforts to enhance customer service.

Compliance. ACME Insurances faced 34 fraud cases and 12 compliance incidents in 2024, reflecting a cautious approach to risk management. While these numbers are concerning, they highlight the company's commitment to maintaining high standards of integrity and operational excellence.

Actionable recommendations

1. Implement continuous monitoring for documentation quality assurance.

To address the compliance incidents, we need to enhance our internal controls and ensure that all documents are consistently accurate and up-to-date. The proactive quality assurance mechanism described in 'Enhanced_Customer_Guidelines_2024.pdf · Documentation' can help us achieve this by replacing periodic manual audits with continuous monitoring.

metric: [compliance_incidents](#) · policy: [Enhanced_Customer_Guidelines_2024.pdf · Documentation](#)

2. Revise the refund policy to eliminate inconsistencies and ensure clarity for customers.

With 12 compliance incidents, it is crucial to review our refund policy as outlined in 'Enhanced_Customer_Guidelines_2024.pdf · Refund Policy'. The current policy needs refinement to remove manual calculation steps and provide a clear, defensible figure that can reduce disputes.

metric: compliance_incidents · policy: Enhanced_Customer_Guidelines_2024.pdf · Refund Policy

3. Ensure all employees complete data protection certification by the annual deadline.

To mitigate risks related to data privacy, we must enforce the requirement for all employees to complete their data protection and privacy certification as outlined in 'Enhanced_Customer_Guidelines_2024.pdf · Data Protection & Privacy'. This will prevent system access revocation issues and ensure compliance.

[1] Enhanced_Customer_Guidelines_2024.pdf · Refund Policy

1. Refund Policy The refund policy for this year represents the culmination of several years of iterative improvement and now offers one of the most customer-friendly return frameworks in the retail sector while maintaining robust controls against fraud and abuse. The refund window has been set at 30 days from the date of purchase, providing customers with substantial time to evaluate their purchase and identify any concerns. Refunds may be issued through an expanded range of methods: the original payment method, store credit, gift card, or digital wallet (including Apple Pay, Google P

[2] Enhanced_Customer_Guidelines_2024.pdf · Refund Policy

1. Refund Policy This removes manual calculation, eliminates inconsistency, and provides the customer with a clear, defensible figure. The approval authority structure has been refined into a tiered model: refunds up to 75 euro may be approved by any trained employee; refunds between 75 and 200 euro require team leader approval; refunds above 200 euro require store manager approval; and refunds exceeding 500 euro require regional authorization. This tiered approach balances speed of service with appropriate oversight based on financial materiality. A landmark change this year is the in

[3] Enhanced_Customer_Guidelines_2024.pdf · Refund Policy

1. Refund Policy Physical receipts remain valid and accepted, and for high-value items exceeding 500 euro, blockchain-verified purchase records are accepted as an additional layer of authenticity verification. Items must be returned in category-appropriate condition, assessed using a new standardized condition assessment checklist that employees complete as part of the return process. This checklist provides objective, consistent criteria for evaluating return condition by product category, eliminating subjective judgments and ensuring fair treatment across all customers and all staff

[4] Enhanced_Customer_Guidelines_2024.pdf · Data Protection & Privacy

5. Data Protection & Privacy Data protection and privacy standards reach their most advanced and comprehensive form this year with the full adoption of a privacy-by-design philosophy that embeds privacy considerations into every new process, tool, technology, and service from its inception rather than treating privacy as an afterthought or compliance overlay. Automated data retention limits are now implemented with intelligent categorization that applies different retention periods based on data type and purpose: transaction data is retained for 6 years (aligned with financial audit re

[5] Enhanced_Customer_Guidelines_2024.pdf · Documentation

4. Documentation This proactive quality assurance mechanism replaces the previous periodic manual audits with continuous monitoring that catches issues in realtime. Digital records are retained for 6 years with automated compliance checks ensuring that retention rules are respected, that records due for deletion are properly destroyed, and that records subject to legal holds are protected from routine purging. The documentation accuracy KPI target is 98 percent completeness rate per store per month, measured through automated system analysis of mandatory field completion and consistenc

[6] Enhanced_Customer_Guidelines_2024.pdf · Data Protection & Privacy

5. Data Protection & Privacy Employees who do not complete certification by the annual deadline have their system access automatically revoked until certification is achieved. Non-compliance with data protection protocols at any level results in immediate access revocation pending formal review, and serious or deliberate violations may result in dismissal.
